Synopsis

A dedicated IT professional with one year of experience in developing Java application and application enhancements. A self-reliant achiever with passion for learning and commitment to deliver. My experience span across requirement gathering, designing, developing, testing, documentation and supporting the application.

Work Experience

Accenture Solutions Pvt. Ltd. : Application Development Associate June '2017 - Present

Project : Intesa SanPaolo Bank

Description : I'm currently working on a banking application known as SetWeb, which is an Internet Based project realized in-house from Financial Institutions Direction – Transaction Services Intesa of SanPaolo Bank. In order to supply to own institutional customers and that of SSB(State Street Bank) a platform of uses of accounts and warehouses.

Experience includes :-

- Developing custom user interface (jsp pages) and client-side validations on it using JS.
- Service calls using Servlets
- Queried database records using JDBC.
- Worked with IBM DB2 and WebSphere server.
- Migrated Banking application UI using Angular to enhance user experience.
- UAT & Pre-production support -> Defects redressal and Change request implementations.

Software : Eclipse, RAD, DB2, WebSphere, TOAD, VMWare.

Languages : Angular, HTML, CSS, JS, Java, Spring MVC, Oracle SQL.
